How to Mount Output Share on Mac

1. Go to your Mac Desktop apple menu. Click on Go > Connect to Server

2. In the server Address bar, type in:

smb://hpc/results/username or smb://hpc.scholastic.ringling.edu/results/username

Replace username with your own login

000	Connect to Server
Server Address:	
smb://hpc.sch	olastic.ringling.edu/results/username + O*
Favorite Servers:	
(a) []	The second se
(C) Hermove	Browse Connect

3. It will then ask for your credentials. Enter your ringling username and password.

0.0.0	Connecting	to Server
	nnecting to smb://hpc.s.	.gling.edu/results/username
	Enter your name an "hpc.scholastic.ring Connect as: Gue • Reg Name: Password: Remember this	d password for the server ling.edu". st istered User password in my keychain

4. Your Output share will appear on your desktop with your username

5. If you open the output folder, your jobs should appear. There should be 3 folders in each job. The output folder contains the renders.

Note: DO NOT rename or work from the output share. It's for copying your files to your own homespace ONLY. You can break the farm for everyone. Failure to follow this rule can result in restricted access. Please just don't.

To Disconnect:

Right click (or Control click) on the output share on the mac desktop

Click Eject "username"
