**QUICKSTART GUIDE**

### mac system preferences

If image isn’t displaying properly launch System Preferences either from the dock or Apple Menu. Click the “Displays” icon under Hardware.

To clone your desktop image to the projector check “Mirror Displays” under the arrangement tab. If you do not have an arrangement tab click hold down the \⌥ option key while you are in the display pane.

### Adjust Resolution

If necessary, select the Display tab & choose 1280x720 or 1280x768.

---

**Input Switche**

On the wall next to the cables select the correct input:

- Input 1 = macbook
- Input 2 = apple tv

If you need sound you may need to plug in the sound cable into the bottom of switcher.

---

**AirPlay**

Press the select button on the input switcher to choose Input 2.

Bring up the control center on your device by swiping up from the bottom area just below the dock.

Tap the \AirPlay button and select Bayou 103.

Slide Mirroring to “ON”

---

**Turn on the Projector**

On the wall next to the entrance door locate the Pixie Control.

Press the PROJ PWR button firmly once.

*Projector will take a few minutes to warm up

---

**Projector Input = DVI**

If for some reason the input has been changed press the source button to cycle through inputs.

---

**QuickStart Guide**

If necessary, select the Display tab & choose 1280x720 or 1280x768.
