

QUICKSTART GUIDE

turn on the projector

On the wall next to the screen locate the Pixie Control.

Press the POWER button firmly once. Twice to power off.

Projector Input = HDMI. If for some reason the input has been changed press the COMP button to cycle through inputs.

*Projector will take a few minutes to warm up

TURN OFF THE PROJECTOR WHEN YOU ARE FINISHED

attach cables

Cables are usually laying on the floor. Attach the DVI to mini display port adapter to your macbook

If you need sound attach the sound cable

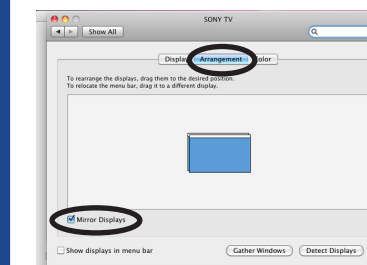

Volume is controlled with your device volume

mac system preferences

If image isn't displaying properly launch System Preferences either from the dock or Apple Menu. Click the "Displays" icon under Hardware

To clone your desktop image to the projector check "Mirror Displays" under the arrangement tab. If you do not have an arrangement tab click hold down the ⌘ option key while you are in the display pane.
