

MACINTOSH NOTEBOOK PROJECTOR SYSTEM PREFERENCES

1 Turn on Projector

Attach Cable

Locate the VGA or DVI cable and attach it to your computer. Attach Audio Cable if necessary.

1

DVI-VGA Adapter
(if necessary)

VGA Cable
(one end attached to projector)

2

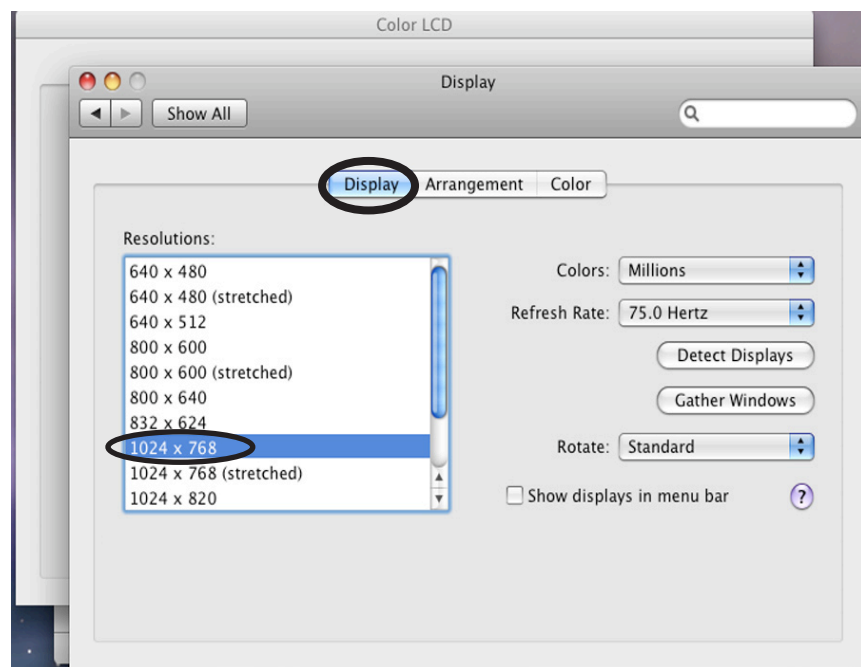

Launch System Preferences

Select System Preferences from the dock or Apple Menu

3 Select Displays

Click the "Displays" icon under Hardware

3

4

Adjust Resolution

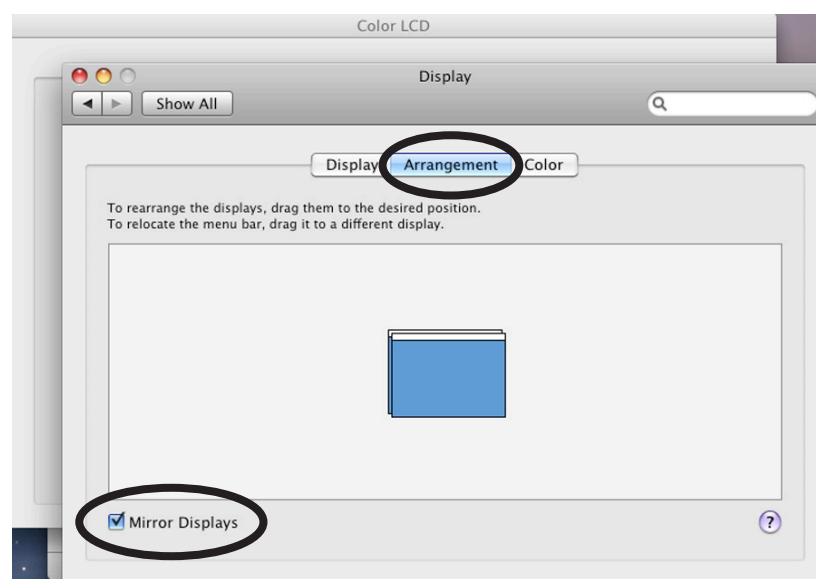

Select the Display tab and choose 1024x768.

*Every projector on campus has a native resolution of 1024x768. Depending on the projector higher resolutions are possible. If you want the crispest text stick with 1024x768.

5 Mirror Displays

To clone your desktop image to the projector check Mirror Displays under the arrangement tab. If you do not have an arrangement tab click "Detect Displays" from the Display tab.

5

6

Adjust Color

Under the projector's display settings. Select the "Color" tab. Sometimes changing the color profile will result in more predictable color and a brighter projected image. Under the color tab try Wide Gamut RGB or sRGB profiles.
